[linkedin.com/in/bilal-nadeem-b427b5320](https://www.linkedin.com/in/bilal-nadeem-b427b5320)

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building production-style, end-to-end web applications using React, Node.js/Express, Prisma, and MySQL, along with Python-based (Flask/Django) applications integrating AI and computer vision. Comfortable owning a project from database schema and REST API design through to a polished, deployed frontend.

WORK EXPERIENCE

Full Stack Web Developer – Ingenious Concepts (Software House)

8 Months

ingeniousc.com

- Developed and maintained full stack web application modules using React.js on the frontend and Node.js/Express on the backend.
- Designed and implemented REST APIs and database schemas (Prisma ORM with MySQL) for internal business modules.
- Built responsive, production-ready UI components with React, Vite, and Tailwind CSS.
- Implemented authentication flows (JWT access/refresh tokens) and role-based access control for multi-user systems.
- Collaborated with the team to debug, test, and deploy features under project deadlines, following Git/GitHub version control workflows.

Lead Generation & Data Scraping Expert – StratiGiant

stratigiant.com

- Managed end-to-end lead generation workflows using LinkedIn, Apollo, and Google Maps.
- Maintained and updated CRM databases to ensure accurate client and prospect records.
- Delivered high-quality prospect lists tailored to target industries and personas.

FULL STACK PROJECTS

StockPilot – Inventory Management System — React, Vite, Tailwind, Node.js, Express, Prisma, MySQL

- Built a full stack inventory management platform with modules for inventory, reports, revenue, and settings.
- Implemented complete JWT-based authentication (access + refresh tokens) with silent token refresh via Axios interceptors.
- Designed the MySQL schema with Prisma ORM and built REST APIs consumed by the React frontend.

Basic HRM (Human Resource Management) System — React, Node.js, Express, Prisma, MySQL

- Built a full stack HRM system covering Employees, Departments, Attendance, Leave Management, Payroll & Payslips, Recruitment & Hiring, Compliance, and Resignation & Exit modules.
- Developed and connected a complete backend (JWT auth, Prisma schema, Express REST APIs) to a fully functional React frontend.
- Deployed the backend to Render with a cloud-hosted MySQL database (Aiven) and pushed the project to GitHub.

Basic Finance Management System — React, Vite, Tailwind, Node.js, Express, Prisma, MySQL

- Built a full stack finance module covering Transactions, Accounts (with running balances), Invoices, Expenses, Budgets, and Reports.
- Implemented a shared state layer (Finance Context) so all forms — Add Transaction, Add Account, New Invoice, Add Expense, Set Budget — are fully functional.
- Designed dashboard analytics including a revenue-vs-expenses chart and an expenses-by-category breakdown.

AI Jarvis – Voice Assistant — Python, Flask, Web Speech API, Groq AI

- Built a multi-user, cloud-deployed voice assistant with a Flask backend and browser-based voice recognition/synthesis.
- Implemented command handling for weather, Wikipedia search, calculator, notes, website opening, and AI chat integration.
- Deployed the application live on Render with a GitHub-based CI workflow.

Emotion AI Detector — Python, Django, OpenCV, MediaPipe, TensorFlow

- Building a Django web application that performs real-time facial emotion detection from webcam input using OpenCV, MediaPipe, and TensorFlow.

Full Stack Task Manager — *React, Node.js, Express, MySQL, Docker*

- Built and debugged a full stack task management app with user authentication, profile/avatar uploads, and task CRUD operations.
- Containerized the backend with Docker and deployed it to Render, with the frontend deployed on Vercel and a cloud MySQL database (Clever Cloud).

OTHER PROJECTS

- Hospital Management System – Database-based hospital operations simulation built in C++.
- Chess Game – Console-based chess implementation in C++.
- Firefighter Robot – Digital Logic Design project for hazard detection and automated control.
- Number Guess Game – Interactive guessing game developed in C++.
- Food Ordering Website – Web technology project for online food ordering and management.

EDUCATION

Superior University Bachelor in Information Technology (BS-IT)	2024 – Present
Kips College, Lahore Intermediate in Computer Science (ICS)	2022 – 2024
LDA Higher Secondary School Matric in Science	2020 – 2022

PROFESSIONAL CERTIFICATIONS

- C++ Programming Certificate (*SoloLearn*)
- MySQL Certificate (*SoloLearn*)
- Freelancing Basics (*DigiSkills*)
- Microsoft Office Specialist Certificate (*Various*)
- SEE Pakistan Certificate (*Superior University*)

TECHNICAL SKILLS

Frontend: React.js, Vite, Tailwind CSS, HTML, CSS, JavaScript

Backend: Node.js, Express.js, Python (Flask, Django), REST API Design

Database & ORM: MySQL, Prisma ORM

Auth & Security: JWT (Access/Refresh Tokens), Role-Based Access Control

AI / Computer Vision: OpenCV, MediaPipe, TensorFlow

Tools & Deployment: Git, GitHub, Docker, Render, Vercel, Thunder Client

Other: MS Office, Google Workspace, Canva, Trello, Slack
